Ride-on mowers range

H80/MKHP3-H80/GPL-H80/MHHP

Family Hydro 80

Total efficiency

The hydro 80 cuts and collects both long and short grass, without clogging. But this little workhorse does much more: for non-collection there is side discharge or rear ejection for longer grass. If you want a mulching mower - hydro 80 does that too. The Etesia Hydro 80 can adapt to all ground conditions, which makes it an incredible versatile machine for the professional landscaper.

PERFORMANCE

Cutting deck with direct rear discharge: no more clogging, even in difficult conditions. Suspended cutting deck with anti-scalp rollers which keep the blades out of trouble. Reinforced and protected blade of 80 cm. Built-in grass-box : **the integrated 240-litre grassbox is emptied without leaving the driving position.** For ease-of-use the system is hydraulically assisted. **Sound alarm** : a buzzer sounds when the large capacity grassbox is full. For meadows, long grass or other cut and drop applications, simply remove the base of the grass-box. A **side deflector** allows the hydro 80 to windrow cut grass. This option is often used in long grass. **Compact design** : Measuring 1.98m x 0.82m wide, hydro 80 can pass through most gateways and its tight turning circle makes it ideal for small or awkward areas. It mows close to walls and fences and is **highly manoeuvrable**. It goes anywhere, with its large-sized front wheels, **the hydro 80 easily overcomes all obstacles** such as pavement kerbs.

COMFORT

Ease-of-use : through step design makes getting on and off the hydro 80 easy. The out-front driving position ensures **excellent all-round visibility**. **Fingertip control** : with its high-backed suspension seat; smooth steering and wheel with guiding knob; ergonomic design plus easy-to-reach controls, driving is easy. **Controls**: cutting height adjustment and emptying the grass collector are carried out from the driving seat. The built-in shock absorber system and hydrostatic transmission give a smooth ride over a wide range of mowing speeds and you can cut in reverse as well! **Transmission** : work at the speed you want. **Low maintenance** : quality built for long-life and low maintenance, hydro 80 has easy access to the engine and all working parts. The hydrostatic transmission system is maintenance-free. **Cleaning of the cutting deck** : A hose point makes it easy to clean underneath the deck.

ROBUSTNESS

The specially coated 60 mm tubular **chassis is designed for strength and long-life**. Reinforced steering. Direct belt transmission. The electromagnetic blade clutch is controlled by self adjustable belt with constant tension. Fitted with the latest **15hp KAWASAKI twin cylinder engine or the HONDA 15,5 HP**, selected for their powerful performance and reliability.

VERSATILITY

Superb mulching thanks to standard included mulching plug. Removable collector base for direct ejection of long grass. Side ejection with swathing deflector for very long grass. **Snow plough**: to clear snow from your paths and pavements fast.

The + products :

- Integrated Grassbox
- Multi-purpose
- Solid and reliable
- Comfortable and ergonomic
- Extremely compact
- Low maintenance
- High grass mowing capability

Technical specifications :

Model (l x w x h)**	hydro 80/MKHP (198x82x117))
Cutting width	80 cm - 32 inch
Engine	Kawasaki FS 481 twin cylinder
Horse power	16 HP - 12,5 kW
Speed	From 0 to 9 km/h Reverse 0 to 8 km/h
Theoretical output (*)	7 200 m ² /h
Grassbox	240 l
Weight	240 kg

(*) According to the mowing conditions (maximum mowing calculation x cutting width = theoretical output)
 (**) l = Length, w = width h = height (in cm)
